

Sculpture Update

The upcoming sculpture for the Warm Sands median strip is by local artist Delos Van Earl. The sculpture was specifically designed for the site at the northern end of the median strip where Warm Sands Drive meets Ramon Road. Known as *Jungle Red*, this monumental work of public art will feature large red steel beams that appear to weave in and out of the ground in way that is both fanciful and dramatic. Lighting and landscaping to complement the sculpture is now being planned and a final design should materialize in the coming months. The artist hopes to begin installing the sculpture this fall.

Delos Van Earl received his Masters of Fine Arts degree from Mills College in Oakland, California. His work has been featured in many solo and group exhibitions, throughout the Western United States. For many years Mr. Van Earl has lived and worked in the Palm Springs area and he is currently represented by Eleonore Austerer Gallery, 73660 El Paseo, in Palm Desert.
